

Your window into  
a new World of Patient  
Monitorization

**CONSOL**  
nTIREVIEW

- The highest level of configuration expected from a Patient Bedside Monitor
- Giving freedom on the same screen with Full Windows feature
- Ability access to HIS, LIS, RIS, PACS, CIS, and any software that Windows provided on the same screen of patient bedside monitor.
- To set new industry standard in patient monitor and device connectivity.
- nTireView is the World's First and Only ...
- Provides the possibility of collecting the data from all types of medical devices used in the patient bed-side, fully connectivity and interoperability with other devices, ability to use all vitals from every devices and measure, visualiate, score, advance alarm management and direct decision support.
- Can be used in all ICU patient groups such as Adult, Pediatric and Newborn.
- HIS/EMR Integration,
- LIS Integration,
- RIS Integration,
- PACS Integration,
- CDS (Clinical Decision Support) Integration,
- All kind of scorings such as APACHE II, APACHE IV, SAPS II, SOFA, GKS, MEWS,...
- Covers all needs in **HIMSS Stage 7** requirements to achieve **Full Digital ICU structure**.

**CONSOL NABIZ**

Vender naturel **ECG device system connectivity**, visualization (Wave-Form viewing), **location free access**, analysis and **interoperability** with all other systems (HIS, RIS, CIS etc.)

### CONSOL Central Monitorization

Location free any type and vender/brand naturel medical devices can simultaneously display multiple patient vital information and multiple device vitals at the same time in the same dashboard, as well as the Doctor / Nurse Central Monitors.

### CONSOL connect

Enhances efficiency and effectiveness of ICU, ER, OR and anesthesia care... Wide range of medical devices connectivity such as Patient Monitors, Ventilators, Defibrillators, Infusion / Perfusion Pumps, Hemodialysis Devices, etc... in ICU, Anesthesia, OR, ER, Ambulance and inpatient services;... Interoperability in Brand and Model Naturel connectivity with medical devices and any Information Systems.

### CONSOL Suite

Consol Medical Information Technologies is providing connectivity with all kinds and vender natural of medical devices (Patient Monitor, Ventilator, Defibrillator, Infusion / Perfusion Pump, Hemodialysis Devices, etc.) in ICU, Anesthesia, OR, ER, Ambulances, etc.

Drive evidence-based care, **Reduce medical errors**, Enhance care compliance, **Improves workflow**, Provides unfettered visibility to patient status, **Identifies potential problems before they occur**, Allows confident decisions at every point of care, **Information made accessible wherever it is needed** and many more benefits...
